

Chapter 35 Vocabulary		Name:
		Period:
1. Population ecology		
2. Population		
3. Population density		
4. Mark-recapture method		
5. Dispersion pattern		
6. Clumped		
7. Uniform		
8. Random		
9. Intrinsic rate of increase		
10. Exponential growth model		
11. Population-limiting factors		
12. Logistic growth model		
13. Carrying capacity		
14. Density-dependent rate		
15. Life table		
16. Survivorship curve		
17. Ecological footprint		
18. Demographic transition		
19. Age struction		

20. Renewable resource management	
21. Maximum sustained yield
